Dealership presents CPR training mannequin to Huron Medical Center on May 10

Bad Axe, Mich. — Having the right tools for cardiopulmonary resuscitation (CPR) training can make the difference between life and death. Now this training will be a little easier in Bad Axe, due to a donation from the National Automobile Dealers Charitable Foundation (NADCF).

On Monday, May 10, Patrick M. Flannery of Flannery & Sons Co. and Tom Thelen and Terry Burns of the Michigan Automobile Dealers Association will present a four-pack of Little Anne™ training mannequin torsos to Huron Medical Center.

The training mannequins give signals telling when the trainee is applying appropriate pressure in the right spot or breathing correctly into the unit's mouth. With the training, students learn the "feel" of giving quick, lifesaving emergency treatment.

CPR training has proven to increase the likelihood of survival from ventricular fibrillation. Many victims who would otherwise die are saved and return to normal activities. The training takes three to five hours for intensive practice and lectures. Additional mannequins will allow the medical center to offer additional CPR training classes to the community.

Flannery & Sons sponsored the medical center's application to the foundation, whose charitable activities are supported by donations from National Automobile Dealers Association and Michigan Automobile Dealers Association members.
